

Angular Hands-On Report

Hands-On 1: Project Setup & Routing

Task Description:

Objective: Create the Angular project, configure routing, and build the Student Course Portal home page.

Hands-On 2: Components, Data Binding & Directives

Task Description:

Objective: Implement components, event/property binding, interpolation, ngIf, ngFor, ngClass and display available courses.

Hands-On 3: Parent-Child Communication

Task Description:

Objective: Use @Input and @Output to pass course data and emit enrollment events between components.

Hands-On 4: Template-Driven Forms

Task Description:

Objective: Create a student enrollment form using Template-driven Forms with validation and successful submission.

The screenshot shows a web browser window with the address bar displaying `localhost:4200/enroll`. The page title is `StudentCoursePortal`. The browser tabs include `Beginner 1 2 3 Hands-on` and `StudentCoursePortal`. The page content includes a navigation bar with links `Home`, `Courses`, `Profile`, and `Enroll`. The main heading is `Student Enrollment Request Form`. The form itself is a white box with a green border containing the following fields:

- `Student Name`: Text input with value `ramu`
- `Email`: Text input with value `ramu@gmail.com`
- `Course ID`: Text input with value `103`
- `Preferred Semester`: Dropdown menu with value `Even`
- `I Agree to Terms`: Checked checkbox
- `Submit` and `Reset` buttons

Below the form, a green message states: `Enrollment request submitted successfully!`

The Windows taskbar at the bottom shows the system clock as 12:52 on 23-07-2026, along with various application icons and a search bar.

Hands-On 5: Reactive Forms

Task Description:

Objective: Build a Reactive Form using FormBuilder, validators, async validation, FormArray and dynamic course addition.
